Question : 10.5.3.20 The sum of some terms of G.P. is 315 whose first term and the common ratio are 5 and 2, respectively. Find the last term and the number of terms.

Solution:

Given:

$$X(z) = \frac{x(0)}{1 - rz^{-1}} \tag{1}$$

$$Y(z) = \frac{x(0)(\frac{r}{1-rz^{-1}} - \frac{1}{1-z^{-1}})}{r-1} \tag{2}$$

By contour integration:

$$y(n) = x(0)\left(\frac{r^{n+1}-1}{r-1}\right)u(n) \tag{3}$$

From (3):

$$315 = 5(2^{n+1} - 1) \tag{4}$$

$$n = 5 \tag{5}$$

$$x(n) = x(0)r^n \tag{6}$$

$$x(5) = 5\left(2^5\right) \tag{7}$$

$$= 160 \tag{8}$$

Therefore, the number of terms is 6, and the last term is 160.
